

Underground tanks caps

Samtech caps are mounted on underground tanks, in the horizontal, vertical and spherical versions.

The main function of these caps is protecting the accessories mounted on the tank, for the filling and monitoring of the LPG content.

The round cap is also available for vertical and spherical tanks, it comes with fixing brackets. A small cap is also available, it is necessary when the horizontal cap is not sufficient.

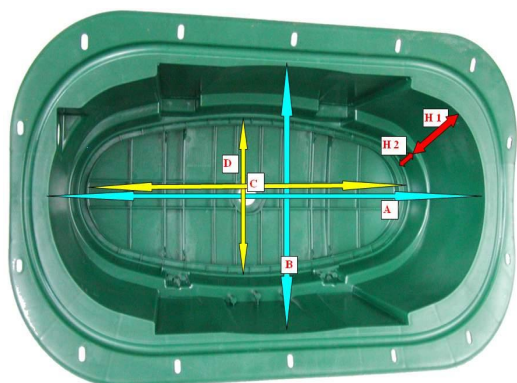

The caps are equipped with nuts M6X20 and washers.

Cap for horizontal tanks*

Materials

- Material of the caps Caps are made of HDPE injection molding
- Material of the nuts
 - Nuts are made of plastic PA6

Small cap for single equipment (i.e. level gauge)

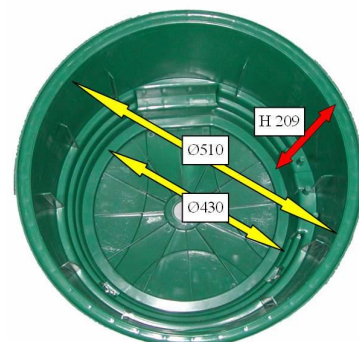

* Caps for horizontal tanks dimensions
